

Service is a Number One activity for UHS.

You know good service before you make a purchase and when you make it you know that your decision was a good one.

UHS offers customers an extensive service package:

1. from non-binding consultation and submission of offers to the turn-key system
2. Remote monitoring, diagnosis, analysis and setting of equipment via network link, analog link or mobile network
3. Cleaning and maintenance of heat exchangers or systems at the customer's place or in our factory
4. Extensive range of spares, e.g., replacement plates or screw-type plate heat exchangers
5. Conversion and extension of available systems
6. Other services on request
